

Marlborough

Worden

The Marlborough furniture series offers a traditional line of library furnishings complimentary to every library environment. This complete line includes workstations, study carrels, display furniture, index tables and library tables. Marlborough tables are available in a large selection of styles and sizes. Table variations offer flexibility and harmony within the series.

Modular carrels complete the Marlborough series with beauty and strength. Panel-end construction provides durability, privacy and the warmth of traditional wood. Each panel is 1-3/16" thick with radiused bullnose edges. Worksurfaces are high pressure laminate at standard heights of 29" or 27". Carrels are available in single face, double face or quad models at 36" or 48" widths.

Library tables are available in three styles: panel end, trestle base and pedestal base.

Marlborough table tops are 1-3/4" thick with high pressure laminate worksurfaces. Edges are banded in solid oak with a bullnose shape.

Panel end tables feature 1-3/16" thick panels with seven select oak veneers. All four edges of the panel are banded with 5/8" radiused solid oak. Tables which are 48" wide have two V-brace steel keels for additional strength. Panel end tables are available in 29" or 27" heights.

Trestle base tables and pedestal base tables feature solid oak base members with a full radius on all edges and exposed ends. These classic tables offer strength with an open air style. Trestle base tables offer a stabilizing, 5-ply lumbercore keel measuring 1" thick by 8" wide. Pedestal bases are assembled using four components fastened together forming a pinwheel base. Trestle base tables and pedestal base tables are available in 29" or 27" heights.

Marlborough display furniture highlights the entire series using traditional Marlborough panel design. These classic pieces are available as lecterns, dictionary stands, atlas stands and record/compact disc browsers (shown) as well as newspaper racks and display tables (not shown). Dictionary stands are constructed with a recessed front panel and adjustable shelf. Atlas stands have five pull-out shelves that operate on full extension metal slides. Dictionary and atlas stands feature a standard plastic laminate and are also available in 34-1/2" high juvenile height.
