

TURNER

Worden The Turner Chair

Where high quality meets basic.

If you appreciate style but also want substance and you want fine wood quality, meet Turner. If you're looking for something basic that still gives you options like arms and upholstered seats, Turner is your chair.

Clean lines

First impressions can be difficult to shake. In Turner's case, the initial statement made—one of reliability, strength, and style—is worth retaining. And we build on that first impression with variations on the theme: optional arms, an upholstered seat, and a variety of finishes.

Sturdy construction

Our high standards take precedence at the very beginning, with the selection of fine oak and maple hardwoods. From there, Worden's reputation for high quality plays out in the craftsmanship and construction, all the way down to the final application of finishes.

Great value

And last but not least, we know your budget is as important to you as our quality. In Turner, you'll find a very solid value that lives up to Worden's signature balance between quality and affordability.
